

IN THE CLAIMS:

Please cancel claims 1 - 6 without prejudice.

Please add new claim 7 as follows:

7. A process for the treatment of psoriasis affecting mammalian skin, comprising:
selecting at least one of a photoactive agent and a photosensitizing agent, the agent
having an electromagnetic radiation absorption characteristic enabling the agent to
absorb at least a first wavelength of electromagnetic radiation from an electromagnetic
radiation source, applying the agent to at least a portion of the mammalian skin affected
by psoriasis, exposing the agent to electromagnetic radiation comprising at least the
first wavelength of electromagnetic radiation, whereby the agent absorbs the first
wavelength of electromagnetic radiation.
